

## Tork DispenserCircle

Why just dispose old and unusable Tork dispensers when you can do it sustainably!

### Benefit from many advantages:

- **Reduction of CO<sub>2</sub> emissions:** Avoid waste incineration to reduce CO<sub>2</sub> emissions.
- **Conservation of resources:** 100 % reuse of Tork dispensers.
- **Simple and transparent:** Our process is straightforward and saves you valuable time.
- **Support your sustainability goals:** Receive proof of your participation and the quantities of plastic collected - perfect for your sustainability reports.

Expand your efforts for the environment in addition to Tork PaperCircle®, our recycling service for paper hand towels. Together we can close loops and create a sustainable future.

# Join in now and protect the environment!

## How it works – simple and efficient

- **Collect:** Empty Tork dispensers are gathered in reusable Big Bags.
- **Return:** The dispensers are collected by your sales partner or a Tork mounting partner when new ones are installed.
- **Recycling:** The collected dispensers are transported to our recycling partner Close the Loop for recycling.
- **Reuse:** The recycled granulate is either used to make new Tork dispensers if it meets our high quality standards, or used for other plastic products.

### Our promise to you:

No Tork dispenser ends up in landfill or incinerators. Join in now and make a sustainable contribution!

## Your advantages at a glance

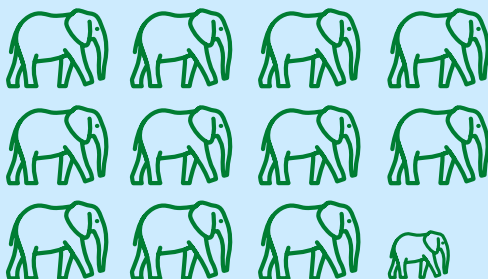

- ✓ **Flexible:** Recycling possible from small quantities
- ✓ **Simple:** Collection via your retail partner or Tork mounting partner
- ✓ **Logistics:** Sustainable thanks to reusable Big Bags
- ✓ **Fast:** Benefit from comprehensive services from a single source
- ✓ **Sustainability goals:** Less waste and increased recycling rate
- ✓ **Certified:** Process in accordance with applicable standards and norms for maximum quality and safety

## Imagine that..

In 2023, we collected 32,000 dispensers from our customers, recycled them and thus saved them from incineration. With an average of 1.3 kg of recycled plastic per dispenser, this corresponds to 41,600 kg and thus the weight of a herd of 11 elephants.

**32.000**  
Recycled  
Dispensers

**11,5**
