

Are your hygiene practices
meeting safety standards?

Tork is the

#1

Professional
hygiene brand
in the world*

Tork is the only
wiper brand with
HACCP FZP
(food contact)
certification

Why Tork?

As the number one professional hygiene brand in the world*, we deal with people in all industries. We know how critical hygiene is in food manufacturing. We can help you meet your obligations, so you can get on with business.

Save time
with exelCLEAN
technology

Reduce risk with HACCP Food Zone Primary (FZP) products

- Tork is one of the only wiper brands with HACCP FZP certification – a large number of Tork wipers and cloths have been evaluated safe to use in direct contact with food
- Without HACCP FZP certification, materials or products used directly on food (or in contact with food) can be high risk, with chemicals or residue leaching into foods
- Most Tork wipers and cloths are protected with fully sealed inner and outer packaging so you can trust them fresh from the box

Increase efficiency

- With consistent, high quality wiping papers and cleaning cloths delivered from protective dispensers in controlled amounts directly at the point of use, Tork helps keep the workplace organised and processes streamlined
- Tork paper products made with QuickDry quality paper is stronger when wet and more absorbent than ordinary paper
- Cleaning cloths made using exelCLEAN™ – a patented foam-spun technology, gives you quicker, more hygienic and more professional cleaning results

QuickDry paper
is stronger when
wet and more
absorbent

Improve employee safety

- Some Tork dispensers are designed for single hand dispensing
- Portable and mobile dispensers allow you to keep wipers nearby
- Easy handling packaging solutions make products easy to handle, easy to open and stable to store

* Based on 2013 Shared Market View data, input from certain local markets and some assumptions for Asia and MEIA, we are confident that with 14.8% of the global market, Tork is by far the biggest Professional Hygiene brand in the world.

HACCP Certification

HACCP certification is designed to provide assurance to (food) buyers and sellers as to the 'fitness for purpose' of products, materials or services.

HACCP has three key Food Zone Classifications:

- FZP (Food Zone Primary) items are suitable to use in the food zone and are suitable for contact with food
- FZS (Food Zone Secondary) items are suitable for touching food contact surfaces but are not expected to touch food during normal conditions of use
- SSZ (Splash or Spill Zone) items are suitable for use in food handling areas such as kitchens, production and processing areas, but are not suitable for coming directly into contact with food or items that will touch food. Tork dispensers are HACCP certified SSZ

How can Tork help businesses with HACCP certification?

Tork provides a complete HACCP solution with leading edge hygiene products to help stop the spread of bacteria and food contamination by meeting strict HACCP Food Zone Primary (FZP) and Food Zone Secondary (FZS) standards.

Tork products are manufactured in HACCP-certified facilities.

Where Tork can help

Tork products can be used across all areas in your facility to improve hygiene. On the following pages, we explain each area in more detail.

Food Zone Production area

- Wiping down food
- Cleaning machinery and parts
- Wiping up spills and food remains

Laboratories and Quality Assurance kitchens

- Equipment cleaning
- Better hand hygiene

Staff kitchens and break areas

- Tea towel replacement
- Hygiene when eating
- Waste disposal

Bathrooms / toilets / clean rooms

- Hygienic washrooms
- Better hand hygiene
- Waste disposal

Good hygiene in production areas is paramount. Tork is the only wiper brand with HACCP FZP (food contact) certification.

Using the right Tork products for the task can not only improve hygiene, but increase efficiency as well. There are a number of issues faced by food businesses in terms of hygiene in production. Issues that are commonly faced include:

- Contaminants in food causing safety concerns
- Poor employee hygiene impacting food quality
- Inefficient cleaning slowing down production

563000	Tork Bin 50 Litre	B1	White	1	1
205630	Tork Bin Lid for Tork Elevation Bin	B1	White	1	1

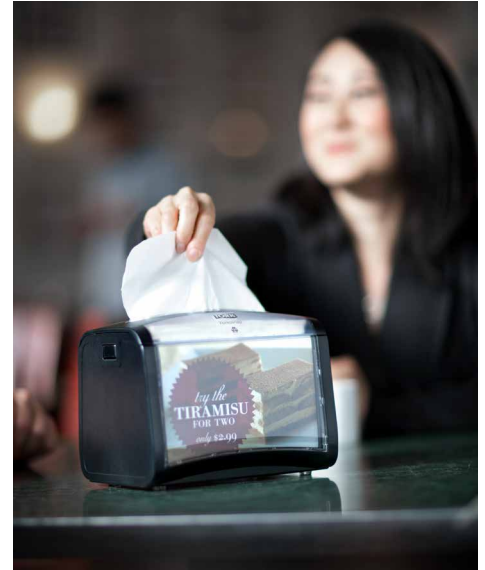

Staff kitchens / canteens / break areas

Wherever food is prepared or served, good hand hygiene is crucial. Washing hands is important, but it's the thorough drying of hands that substantially reduces bacteria.

In staff kitchens and break areas, hygiene can sometimes be forgotten. Issues that are commonly faced include:

- Poor employee hygiene
- Messy areas that are not presentable
- High costs associated with kitchen maintenance

- Use for drying dishes, handling hot food items and cleaning surfaces
- Reduce the risk of contamination compared to overused, unhygienic tea towels

Tea Towel Replacement

Article number	Description	System	Colour	HACCP classification	ISEGA	Easy Handling	Quantity per pack	Packs per case
530177	Tork Heavy Duty Cleaning Cloth	W4	White	FZP	●	●	60 cloths	5

Sustainable sourcing, third party certifications and EPDs derisk purchasing decisions

The mark of responsible forestry

FSC® (Forest Stewardship Council®) certification is internationally recognised as having the most rigorous environmental and social standards for responsible forest management and traceability.

EU Ecolabel, with a life cycle approach, guarantees that the products' main environmental impacts are reduced in comparison to similar products on the market.

Environmental Choice New Zealand (ECNZ) operates to international specifications requiring a reduction of impact over the product life cycle.

Environmental Product Declarations (EPDs) are independently verified and registered documents containing transparent and comparable data about the environmental impact of products through their life cycles.

ISEGA conduct independent testing and certification of material intended to come into contact with foodstuffs.

HACCP (Hazard Analysis and Critical Control Points) is an internationally recognised risk management system identifying, evaluating and controlling hazards related to food safety.

Swedish Rheumatism Association 'Easy to use' certification is awarded to products that can easily be used by people with reduced hand strength.

ProDerm dermatologically approved products have been put through stringent dermatological clinical testing by leading international research organisation.

EN1500 indicates that the antimicrobial activity of hygienic handrub has been tested to ensure micro-organisms are reduced to safe levels.
