

Tork helps you reach your sustainability goals by making sustainability easier.

Focus4 sustainability product benefits

-  2 Materials & packaging
-  4 Use & waste
-  2 Carbon
-  4 Hygiene for all

Materials & packaging

- FSC® certified refills – the wood-based fibre in the product has been responsibly sourced.
- Inner packaging is made from at least 30% post-consumer recycled plastic.

Use & waste

- Optimise consumption and minimise waste with the one-at-a-time dispensing feature.
- The cloths are suitable for repeated use, this helps to reduce consumption.
- Cuts solvent consumption by up to 40%. (1)
- 20% less packaging waste. (2)

Carbon

- Since 2011, we have reduced the carbon footprint on our exelCLEAN assortment by 28%. (3)
- Tork exelCLEAN has an average cradle-to-grave carbon footprint of 39.4 g CO2e per sheet, with cradle-to-gate part 28.9 g CO2e per sheet. (4)

Hygiene for all

- Refills are third-party verified for short-term food contact.
- One-at-a-time improves hygiene, because the user touches only their own wiper.
- Reduces cleaning time by up to 32% versus rags. (5)
- Tork Easy Handling® ergonomic packaging for easier carrying, opening and disposal.

For Wiping

The information includes sustainability benefits on a system level for [Tork exelCLEAN®], covering Tork refill & dispenser assortment for respective country. In cases where a specific benefit does not apply to all products in the assortment, this is clearly indicated.

1. When cleaning with wipers vs rags and rentals. Panel test conducted by Swerea Research Institute, Sweden, 2014. Rental cloths, cotton rags and mixed rags were compared to Tork Heavy-Duty Cleaning Cloths.. 2. Versus previous version; calculated per pound/kg/ton of product, 2021.. 3. Based on life-cycle assessment done by Essity and third-party verified in April 2021. Emission reduction vs assortment in 2011.. 4. Represents the Tork exelCLEAN European refill assortment per sheet. Based on third-party-reviewed life-cycle assessments (LCA) covering all refill quality tiers. Because this data is a system average, it is not intended to be used in carbon reporting for specific articles and consumption... 5. Panel test conducted by Swerea Research Institute, Sweden, 2014. Rental cloths, cotton rags and mixed rags were compared to Tork Heavy-Duty Cleaning Cloths.
