Tork Clean Care™

## Tork cleaning for Industry checklist

Washroom and Changing Room Cleaning

- Put on protective gloves and attire. Wear gloves for cleaning procedures. Gloves should be discarded after each cleaning. If using re-usable gloves, they should be dedicated for cleaning and disinfecting surfaces of certain zones in the working area.**
  
- Empty rubbish and recycling bins – replace liners and make sure to sanitise inside and outside of the waste bins as needed.**
  
- Clean and sanitise all high-touch surfaces with a soap and registered disinfectant product. Use a new wiper for each area to reduce cross-contamination.**
  
- Restock all dispensers to ensure proper hygiene and handwashing practices can be achieved.**
  
- Mop the floor, with special attention to areas around the toilets and sinks. To reduce cross-contamination consider disposable cleaning options.**

Tork Clean Care™

## Employee health & hygiene tips

- Implement hygiene training for employees
- Post proactive signage promoting proper handwashing
- Implement hygiene training programme for janitorial staff
- Provide single use paper towels to dry hands thoroughly after washing
- Install at least one soap dispenser for every two sinks
- Locate rubbish bins near sinks and exit door
- Have a visible clock that displays seconds
- Utilise dispensing systems that allow users to only touch the towel they take
- Provide waterless hand sanitisers
- Ensure all dispensers have sufficient capacity to ensure availability to all users between cleaning rounds, promoting good hygiene

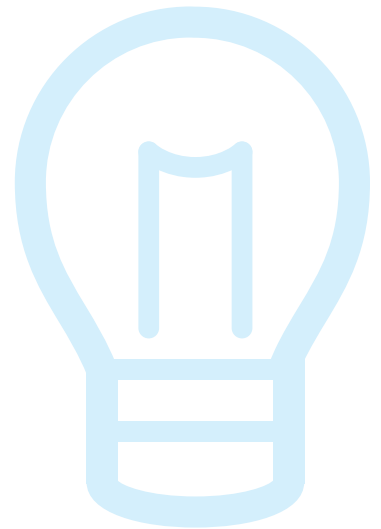

## Workplace surface hygiene tips

- Wear gloves for cleaning and sanitising procedures
- Wash hands immediately after gloves are removed
- Use colour-coded wipers and dedicate a colour for cleaning and disinfecting surfaces of a certain zone
- Always follow the manufacturer's instructions for all cleaning and disinfection products (e.g. concentration, application method, contact time, etc.)
- Check to ensure any cleaning or disinfecting products are not past their expiration date. Expired chemicals will not disinfect effectively
