

Tork helps you reach your sustainability goals by making sustainability easier.

## Focus4 sustainability product benefits

### Materials & packaging

- Biobased cleaning cloths includes Heavy-Duty Cleaning Cloth (99% biobased), Kitchen Cleaning Cloth (100% biobased) and Long-Lasting Cleaning Cloth (100% biobased). (1)
- FSC® certified refills – the wood-based fibre in the product has been responsibly sourced.
- The Biobased Heavy-Duty Cleaning Cloth is made from 99% renewable fibres. (2)
- Inner packaging is made from at least 30% post-consumer recycled plastic.

### Use & waste

- Optimise consumption and minimise waste with the one-at-a-time dispensing feature.
- The cloths are suitable for repeated use, this helps to reduce consumption.
- Cuts solvent consumption by up to 40%. (3)
- 20% less packaging waste. (4)

### Carbon

- Tork exelCLEAN Biobased has an average cradle-to-grave carbon footprint of 28g CO2e per sheet, with cradle-to-gate part 26.2g CO2e per sheet. (5)

### Hygiene for all

- Refills are third-party verified for short-term food contact.
- One-at-a-time improves hygiene, because the user touches only their own wiper.
- Reduces cleaning time by up to 32% versus rags. (6)
- Tork Easy Handling® ergonomic packaging for easier carrying, opening and disposal.

For Wiping

The information includes sustainability benefits on a system level for [Tork exelCLEAN® Biobased], covering Tork refill & dispenser assortment for respective country. In cases where a specific benefit does not apply to all products in the assortment, this is clearly indicated.

1. Based on tests done for TÜV Austria, OK Biobased certification.. 2. Based on tests done for TÜV Austria, OK Biobased certification.. 3. When cleaning with wipers vs rags and rentals. Panel test conducted by Swerea Research Institute, Sweden, 2014. Rental cloths, cotton rags and mixed rags were compared to Tork Heavy-Duty Cleaning Cloths.. 4. Versus previous version; calculated per pound/kg/ton of product, 2021.. 5. Represents the Tork exelCLEAN Biobased European refill assortment per sheet. Based on third-party-reviewed life-cycle assessments (LCA) covering all refill quality tiers. Because this data is a system average, it is not intended to be used in carbon reporting for specific articles and consumption.. 6. Panel test conducted by Swerea Research Institute, Sweden, 2014. Rental cloths, cotton rags and mixed rags were compared to Tork Heavy-Duty Cleaning Cloths.
